Subject: PFAS Discussion
Importance: High

All,

WED Management here in Headquarters would like to set-up a teleconference call to discuss PFAS there in North Carolina to assist with the Chemours case development. Please let me know of your availability and will be sure to send out a scheduler; this meeting would only last about an hour and would take place sometime next week. Any assistance in this matter is greatly appreciated.

-Charlie

Subject: Strynar call follow-up

Charlie,

It was great to chat. Sorry I didn't catch your colleagues last name to include him. I am ccing Andy and James so you have their contacts in case you have any follow-up questions.

Here is some info we can share now. This paper (McCord and Strynar) (NOT TO BE SHARED WITH CHEMOURS YET) is an assessment of any other PFAS we had not yet described in Strynar et al., 2015 and Sun et al., 2016.

Also find attached a presentation I made in SETAC 2104 on behalf of Andy Lindstrom for our work on PFAS in the Upper Cape Fear drainage basin due to biosolid application.

Let me know if you have any follow-up questions.

Mark
